REPLACEMENTS FOR PRODUCTS PRODUCED BY UNITRA-CEMI
SCIENTIFIC-PRODUCTION CENTER OF SEMICONDUCTORS

The list of replacements for CEMI-produced products includes most often used products produced by UNITRA-CEMI Scientific Production Center of Semiconductors as well as their exact and approximate equivalents produced by some overseas firms.

Elements not denoted by additional marks constitute replacements, that is, exact equivalents of CEMI-produced elements. Elements denoted by the mark "~" differ by certain parametric values and may replace CEMI-produced elements after taking these differences into account.

For the purpose of finding the replaced elements easily, this list is arranged in alphabetical order.

The list is intended for service and construction use and therefore also includes elements produced in previous years as well as products anticipated to be introduced, and also products not having equivalents.
